# Valves VHEM, manually operated

Key features

FESTO

## Innovative

- Small and compact for a wide range of pneumatic applications
- Numerous selectable valve functions: 3/2-way and 5/2-way functions
- With flow rates of up to 1,000 l/min, valves VHEM offer outstanding pneumatic performance for a wide range of applications
- Low weight
- Minimal actuating forces

## Versatile

- Flexibility of the pneumatic working lines provides a practical solution to different requirements
- Round silencer for ducted exhaust air
- Suitable for vacuum in some cases
- Reverse operation possible in some cases
- Actuation: direct and piloted
- Pressure range from vacuum to 10 bar possible
- Design:
  - Pushbutton valve
  - Toggle lever valve
  - Hand lever valve
  - Finger lever valve
  - Foot valve

## Reliable

- Durable thanks to proven piston spool and piston poppet valves
- Sturdy thanks to metal or plastic housing and connecting thread or connector

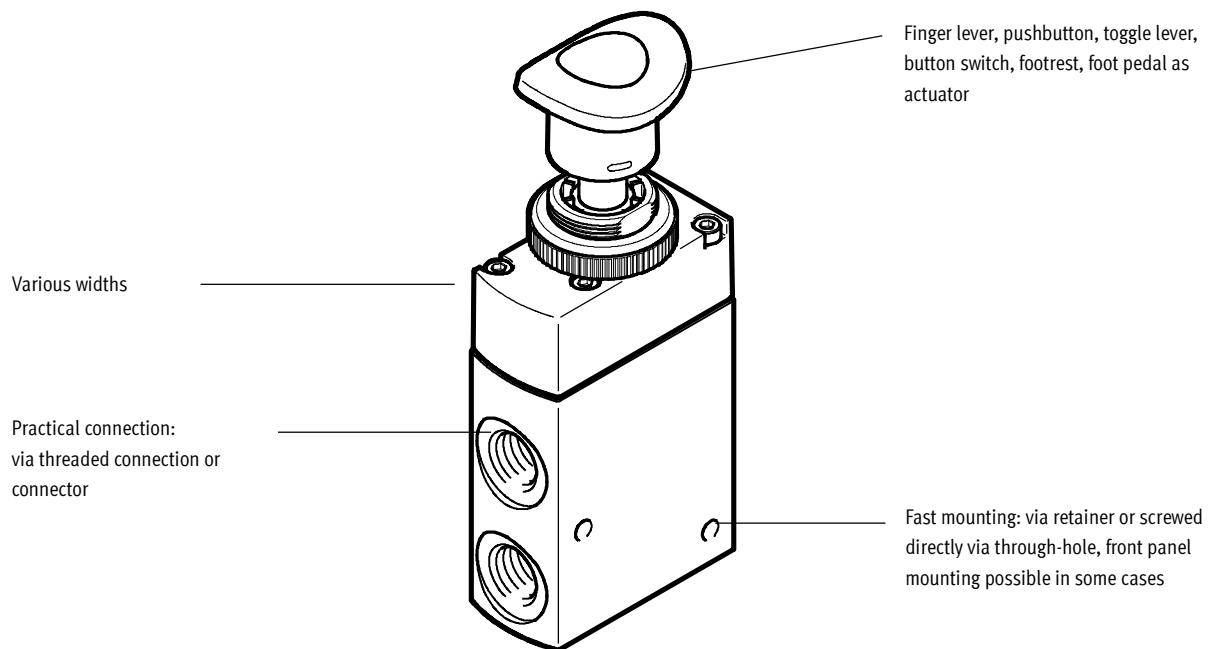

## Easy to mount

- Front panel mounting or mounting on bracket

Key features

## Equipment options

### 3/2-way valve

- Normally open/closed
- Mechanical spring
- Vacuum operation possible
- Pneumatically piloted or directly actuated
- Ducted exhaust air
- Detenting (bistable) or non-detenting (monostable)

### 5/2-way valve

- Pneumatic spring/mechanical spring
- Vacuum operation possible
- Reversible
- Pneumatically piloted or directly actuated
- Ducted exhaust air
- Detenting (bistable) or non-detenting (monostable)

## Manually operated valves

Manually operated valves are used in all industrial sectors, as well as in the commercial trades. They are used to

carry out simple processes such as clamping or closing safety doors. Depending on the desired actuation

(pushing, rotating/swivelling or tilting), the valves are either detenting or non-detenting. The valves are directly

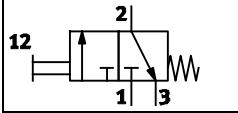

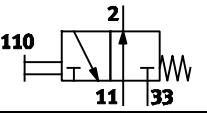

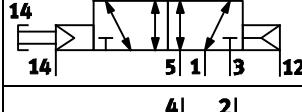

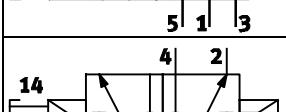

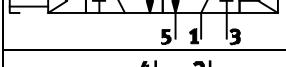

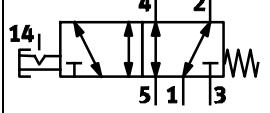

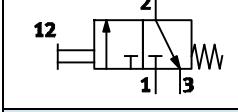

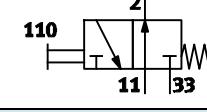

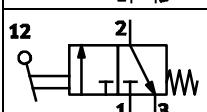

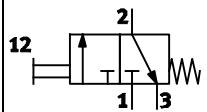

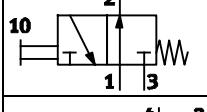

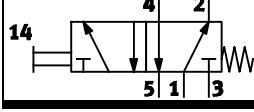

controlled in some cases or are pneumatically piloted.

- Note  
A filter must be installed upstream of valves operated in vacuum mode. This prevents any foreign matter in the intake air getting into the valve (e.g. when operating a suction cup).

Foot valve with detent FP

Note

Foot valves with detent are actuated by means of a foot lever with mechanical detent.

The valve engages when it is first actuated, and when the foot lever is actuated again, the valve returns to its normal position.
